

MIDDLE EAST UNITED COMPANY FOR MAINTENANCE OF OIL FACILITIES, WELLS, REFINERIES & PETROCHEMICALS W.L.L. (MEMOC)

Advancing Asset Integrity for the Energy Sector

Corporate Overview

MEMOC is a Kuwait-based specialist company providing advanced asset integrity, corrosion monitoring, and failure analysis services to the oil, gas, refining, and petrochemical industries. Our solutions are designed to protect critical assets, reduce lifecycle costs, and enhance operational reliability through engineering excellence and data-driven decision-making.

Address

Kuwait – Ahmadi Governorate
Mangaf – Block 004 – Plot 005408
Building: Heirs of Abdullah Khalaf Sayer Al-Harbi
1st Floor – Unit No. 26

Vision

To lead the advancement of asset integrity management in the oil and gas industry through innovation, technology, and proven engineering practices.

Mission

Delivering precision-driven corrosion monitoring, assessment, and integrity solutions that safeguard assets and enhance operational performance.

Core Services

1. Internal Corrosion Monitoring (ICM)

- Advanced monitoring and assessment of internal corrosion in pipelines and production assets, including downhole corrosion.
- Continuous data acquisition and analysis for proactive corrosion management.
- Supply of ICM tools such as access fittings, corrosion coupons, probes, and retrieval systems.

- Installation of ICM equipment at representative locations during construction and operational phases.
- Deployment of experienced technical manpower for safe and reliable installation and retrieval activities.

2. Long-Term Service Contracts

- Customized corrosion monitoring and mitigation contracts.
- Preventive maintenance programs.
- Cathodic protection monitoring support.
- Chemical injection performance monitoring and optimization.

3. Chemical Injection Quills – Maintenance & Supply

- Retrieval, inspection, repair, and replacement of chemical injection quills.
- Supply of standard components and spares for chemical injection skids.

4. Chemical Selection & Performance Evaluation

- Development of Standard Operating Procedures (SOPs) for integrity and process chemical testing.
- Coordination of third-party laboratory testing and field trials.
- Independent review and interpretation of laboratory test reports.
- Chemical efficacy studies under actual operating conditions, including corrosion and microbiological monitoring.

5. Failure Analysis & Root Cause Assessment

- Detailed metallurgical and corrosion-related failure investigations.
- API and AMPP-aligned Root Cause Analysis (RCA).
- Actionable recommendations to prevent recurrence and enhance asset reliability.

Data-Driven Asset Integrity – MEMOC’s Strategic Vision

MEMOC envisions the integration of siloed operational and integrity data across facilities to uncover hidden correlations that significantly enhance asset integrity management. This approach combines domain expertise with advanced data management tools, enabling asset owners to make informed, predictive, and cost-effective decisions.

As part of this vision, MEMOC introduces clients to advanced inspection and assessment technologies, including: - **Robotic Tank Bottom Inspection** (API-compliant) - **Pipeline Integrity Assessment Software** (AMPP-approved)

Selected Clients & Business Partners

(Representative client and partner logos may be presented here for executive presentations.)

Completed Projects – Selected Highlights

No.	Contract / PO Reference	Scope of Work	Completion Date	Client / Facility
1	PO#479108839	Corrosion coupon & probe retrieval services	22-Dec-2022	Jurassic Production Facility (JPF-2), East Raudhatain – SLB
2	PO#4791515328	Refurbishment of damaged corrosion coupon access fittings and reinstallation	22-Dec-2022	SLB
3	KOC SO GMNW/ S7/062/23	Gas corrosion inhibitor injection quill retrieval & maintenance (3 nos)	08-Jan-2023	BS-171, KOC
4	KOC SO GMNW/ S7/063/23	Gas corrosion inhibitor injection quill retrieval & maintenance (2 nos)	08-Jan-2023	BS-171, KOC
5	PO#JPF_001580-1	Full coupon fitting and access fitting services	23-Feb-2023	JPF-1 – SPETCO
6	PO#P000021	Study on impact of 400 kV overhead transmission line crossing	20-Mar-2023	WJO
7	PO#4792196083	Internal corrosion monitoring services	20-Sep-2023	East EPF – Sabriya, SLB
8	PO#4792218806	ICM services including coupon holder refurbishment	25-Sep-2023	EPF – Sabriya, SLB
9	PO#JPF_001811-1	Coupon and probe services including refurbishment	13-Mar-2024	JPF-1 – SPETCO

Commitment to Clients

These projects represent only a snapshot of MEMOC’s capabilities. We are committed to delivering reliable, safe, and technically robust corrosion monitoring and mitigation solutions that extend asset life and enhance operational confidence.

Executive Leadership

S. Surya Prakash

General Manager

A senior corrosion and asset integrity professional with over **30 years of national and international experience** across oil & gas production, refining, and transportation sectors.

Key Highlights: - Expertise in internal corrosion, materials selection, failure analysis, and integrity management. - Proven leadership in delivering complex Root Cause Analysis studies, including major equipment failures. - Pioneer of innovative corrosion mitigation methodologies, including bacteria inhibition techniques presented at the NACE Corrosion Conference (USA). - Extensive experience in multidisciplinary engineering teams, advising on materials, welding, corrosion control, and failure prevention. - Strong people leader with a track record of mentoring and developing engineers and technicians into senior technical roles.
